VOXSYNC

Senior Android Developer

Position ID#: DV-2-20140617

This posting is for a permanent, full time position, on-site at our offices. You must have valid work status to be considered for this position. This is NOT a contract or a freelance job.

As a Sr. Android Developer, you will develop native applications for smartphones and tablets for Android devices. You'll be required to code, debug problematic code, as well as execute general troubleshooting and problem solving. You'll lead a team of intermediate and junior Android developers and work together with our project managers and designers to create great apps.

Responsibilities:

–   Gathers and analyzes business requirements and use cases from internal stakeholders for mobile and/or web applications.
–   Assists in identifying functional/non-functional requirements, risk assessments, and providing assistance at all phases of a project from requirements to delivery.
–   Builds task lists and resource requirements for project builds to be shared and reviewed with the rest of the team.
–   Implements solutions using appropriate mobile technologies and creates unit test cases to verify functionality against specifications.
–   Works with cross-functional teams to produce and maintain internal and external-facing documentation.
–   Provides application development support for mobile platforms, including regular maintenance and enhancements to these applications, web services and/or databases.
–   Provides support with respect to building and updating content as required.
–   Troubleshoots issues reported by stakeholders and debugs and implements code fixes as required.
–   Maintains up-to-date knowledge of related technology advancements and enhancements.

Qualifications:

–   Post-secondary education in engineering, computer science OR equivalent experience.
–   3 to 7 years' experience with mobile application development using Java for Android.
–   Strong understanding of design patterns over and above MVP and MVC.
–   Expert working knowledge of Java, Android SDK and Android Studio.
–   Published Android applications on the Google Play Store are a must have.
–   Ability to implement custom native interfaces using the latest Android programming techniques.

- Able to adapt to new technologies in a constantly changing fast paced environment.
- Strong team player and able to work in a team of other talented developers.
- Strong familiarity with database design concepts, RDBMS, SQLite, MySQL/PostgreSQL.
- Familiarity with AWS elements, RESTful APIs, and multithreading.
- Some interface design capabilities and skills is a nice to have.
- Objective/critical thinker capable of refactoring code to achieve highest degree of optimization.
- Possesses leading edge technical knowledge.
- Strong analytical skills, strong background in analyzing new and complex requirements and assessing both business and technical impact.
- Attention to detail and a positive, collaborative attitude.

Employee Perks:

- Group Health Benefits
- Fun, cool, and openly collaborative environment
- Challenge colleagues to an occasional game of Wii/XBOX360
- Represent the company at applicable Android related technology events like Google IO

Interested applicants please submit your resume to careers@voxsync.com with the position title in the subject line.
